

Obsolescence notification

PF6 peristaltic filler

Background

Flexicon Liquid Filling launched the PF7 peristaltic filler as a replacement of the PF6 peristaltic filler on 11 December 2017.

Continued availability of the PF6

The PF6 peristaltic filler (part code 91-050-008) will be available for three months following the launch of the PF7 peristaltic filler, until 30 March 2018.

After that date, the PF6 peristaltic filler will no longer be available.

Replacement with the PF7

The PF6 peristaltic filler has been replaced with the PF7 peristaltic filler, offering an updated bench top peristaltic filler for aseptic liquid filling.

The new PF7 peristaltic filler is equivalent in performance and functionality to the current PF6 filler and features many new user operational benefits including:

- HMI with large intuitive colour display
- USB connectivity available to a balance to avoid human error when typing in the calibration values
- User login with PIN protection

Warranty

The PF6 peristaltic filler will be supported for seven years following the date of obsolescence.

Order information

Product	Part code	Availability
PF6	91-050-008	Up to 30 March 2018
PF7	91-060-00x	From 11 December 2017
